## TwinLuxe - A new generation of SHAVING

Founded by identical twins, Anthony and Hubert Tsai, TwinLuxe is a comprehensive luxury men's grooming line designed for all skin types. Successful financiers in New York, the brothers wanted to always look their best and they found the existing shaving skincare products on the market didn't meet their standards so they decided to launch a line of luxury men's grooming products, designed for successful young professional men.

Taking inspiration from their Oriental heritage, the founders started researching the effects of different Asian botanical plants such as hydrolyzed rice protein and centella asiatica extract on skin. After four years of research, they developed proprietary formulations which have been clinically proven to help strengthen skin tone, improve skin smoothness and promote anti-aging. Paraben-free and not tested on animals, the products were meticulously tested on a wide range of people with different skin types to ensure that TwinLuxe's 'Shaving Skincare' would be suitable for all skin types, including the most sensitive and problem skin.

When it came to the razors, the twins wanted to revolutionise the old English style barbershop-style shaving sets and bring them into the 21st Century. They worked with the designer behind the Rolls-Royce Phantom's exterior to create TwinLuxe's 'Fine Shaving Instruments' set using advanced technologies found in fine watches, luxury cars and surgical instruments for the shave set. For the shave brush, they only used natural silvertip badger hair, which retains water like a sponge and effortlessly lifts the beard and gently exfoliates the skin to achieve the closest shave possible.
